# ESCAPE Character:

Escape characters are used to remove the special behaviour of wild characters [ -, and %.] and treat them as Normal character

Whenever we use escape character we need to mention what is the escape character used

Escape chactor is used before the wild character who's special (behaviour) has to be remove

```
SYNTAX DB.Column/Exp Like Pattern-to-match
                          Escap 'Escape charcter'
```

[ ! @ $ # ]

! = % Escape !

@ %.%. Escape @

%. @ _ and text Escape

↓   ↓   ↓
S.C  E.C  N.C

WAQTD Name of the employee whos name start with _ and ends with %.

```
Select ename
From Emp
where ename like '@_%.@%.
                 escape '@';
```
